

Chlorhexidine in gargling solution and mouth rinsing solution

Gargling solution at 200 nm and 254 nm; dilution 1:20

- Mode: MEKC, short end
- Electrolyte: Borate, SDS
- Capillary: 50 µm ID, 56 cm, bubble cell

Mouth rinsing solution at 200 nm and 254 nm; dilution 1:20

- Separation: 30 kV, 25°C
- Injection: hydrodynamic
- Detection: direct UV, 200 nm and 254 nm
