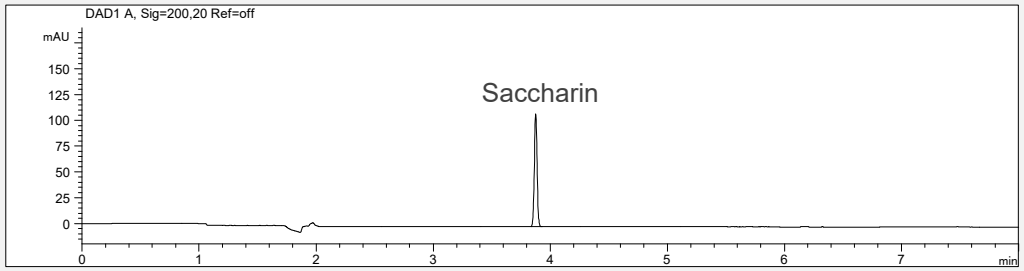
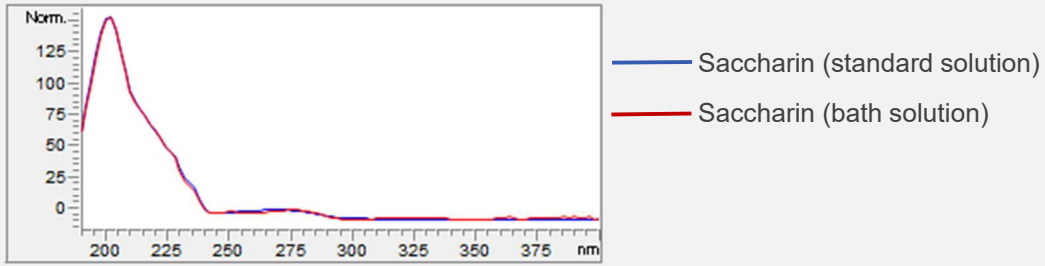
Saccharin in a Bright Nickel Bath

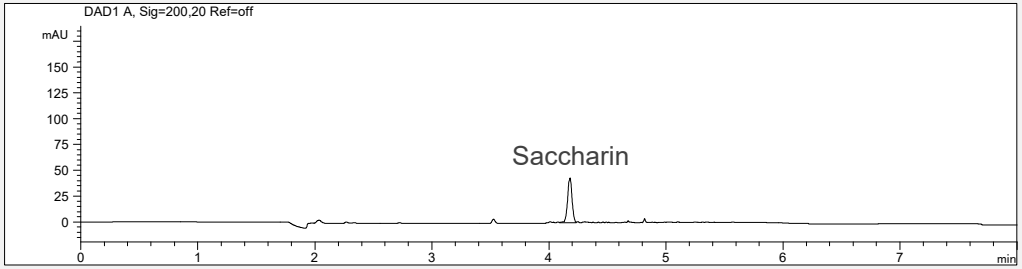
a) Standard solution: 20 mg/l Saccharin



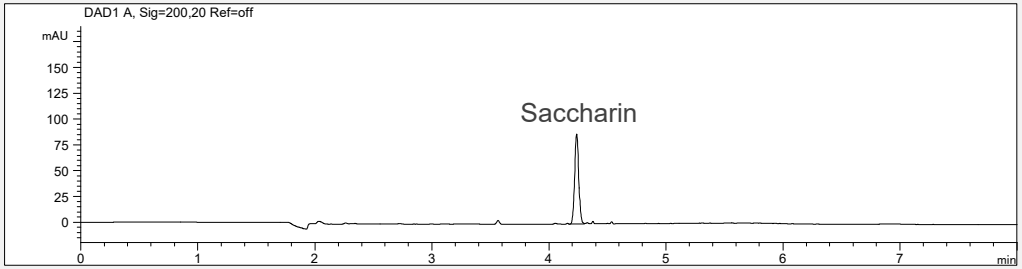
b) Spectral data: Saccharin peak



c) Bright Nickel Bath, dilution 1:200



d) Bright Nickel Bath, addition of Saccharin



- **Mode: MEKC**
- **Electrolyte: Borate, SDS**
- **Capillary: fused silica, bubble cell, 50 µm I.D., 40 cm effective length, 48.5 cm total length**
- **Injection: 50 mbar, 10 s**
- **Detection: indirect, 200 nm**
- **Separation: 25°C, 30 kV**
